Projects

- **AI-Powered Resume and Authenticity Ranking (Ongoing):** This project enhances recruitment by integrating NLP, ML, Speech Sentiment Analysis, and Facial Expression Recognition. It automates resume ranking based on job relevance and uses AI-driven communication skill assessment through speech and facial cues.
- **'VILEEDGE' - Village Management System:** A web-based complaint management system allowing users to report and track issues across departments. Built using Django, HTML, CSS, JavaScript, and MySQL.
- **Movie Ticket Booking System:** A Java-based system featuring movie selection, seat booking, and payment simulation. Implemented using Java Swing and JDBC with MySQL.

Skills

- **Programming Languages:** C, Python, Java
- **Web Technologies:** HTML5, CSS3
- **Databases:** SQL, MongoDB
- **Libraries & Tools:** Pandas, NumPy, IntelliJ, VS Code
- **CS Fundamentals:** DSA, OOP, OS, DBMS
- **Development Skills:** Git, Debugging, Optimization
- **Analytical Skills:** Problem Solving, Logical Reasoning, Critical Thinking
