## Projects

- **Product Review System :** Web-based System - where users can leave and read reviews, backend system - (like a database and API) , Sentiment analysis or AI - to evaluate the reviews.
  - **Portfolio Website (using HTML, CSS, JS):** Designed and implemented a personal website showcasing professional projects and skills.
  - **LLM Compiler and 5 Risks-(ongoing) :** LLM compiler is a concept that involves using Large Language Models (LLMs)—like GPT—to assist with or fully automate code generation, compilation, and optimization tasks. These LLMs can translate natural language or high-level instructions into code, optimize code snippets, or even generate complete applications. Think of it as using AI as a new kind of compiler that "understands" both human intent and programming.
