

Job Title

AI/ML Engineer – Fresher / Entry Level

About the Role

We are looking for a fresher with an interest in Artificial Intelligence and Machine Learning. You'll help the team prepare datasets, test simple ML models, and learn applied AI practices.

Responsibilities

- Collect and preprocess datasets.
- Write Python scripts for basic data analysis.
- Assist in training and testing machine learning models.
- Document experiments and share findings.
- Stay updated with ML trends and new tools.

What We're Looking For

- Basic Python programming knowledge.
- Familiarity with at least one ML library (like Pandas or Scikit-learn).
- Curiosity and eagerness to learn.
- Strong logical and problem-solving mindset.

Nice to Have

- Hands-on project in AI/ML during academics.
- Knowledge of statistics or linear algebra.
- Participation in Kaggle or hackathons.
- Exposure to TensorFlow or PyTorch.

Qualifications

- Bachelor's in Computer Science, Data Science, or related field.
