

## Job Title

Full Stack Developer – Entry Level

## Role Summary

We are looking for an enthusiastic Full Stack Developer to join our team and help build engaging and efficient digital products. You'll work on real projects from the start, developing features that improve user experience and product functionality. This is a great opportunity to learn from experienced professionals, gain hands-on experience with modern technologies, and grow your skills in a supportive environment.

## Key Responsibilities

- Assist in developing and maintaining web applications using modern front-end and back-end technologies.
- Work on RESTful APIs and middleware that power user-facing features.
- Collaborate with product, design, and operations teams to create smooth and intuitive user experiences.
- Participate in code reviews, testing, and agile development processes.
- Help improve application performance, security, and scalability.

## Skills & Qualifications

### Required:

- Basic understanding of JavaScript and frameworks like React.js.
- Familiarity with back-end development using Node.js, Python, or similar technologies.
- Awareness of RESTful APIs, databases (SQL or NoSQL), and version control tools like Git.
- Good problem-solving and communication skills.
- Willingness to learn and work in a team environment.

### Nice-to-have:

- Exposure to AI/ML tools or workflows such as chatbots or recommendation systems.
- Knowledge of cloud platforms or deployment tools (Docker, AWS, Azure, etc.).
- Interest in building user-centric products and learning new technologies.
