## Profile

---

I am a technology-driven Information science student. Highly motivated and passionate about software engineering and problem-solving known for innovative solutions, maintaining a professional approach, creating impactful software, and actively contributing to the community. Strong team player with excellent communication skills and a proactive approach to software development challenges. Eager to contribute technical expertise and collaborate effectively with cross-functional teams.

## Education

---

**10th,morarji desai residential school bommanakatte,chitradurga** 2019 – 2020  
percentage: 94.88

**12th,dvs independent pu college,shivamogga** 2021 – 2022  
percentage: 89.00

**Information Science and Engineering, Bengaluru** 2022 – Present  
Till 5th Sem: 7.55 CGPA

## Skills

---

**Data Structures and Algorithms**

**java**

**Full-stack development**  
learning

**React-native**  
learning

**Python**  
AI and ML basics

## Certifications

---

- Data Structures And Algorithms
- Artificial intelligence and machine learning course
- computer networks basics by cisco

## Projects

---

### database for banking system

Developed a MySQL-based banking system with simple schema and enhanced security. Features an intuitive GUI, efficient event handling, and clean, modular code for extended functionality.

### image caption generator

developed a web application that generates descriptive captions for images using deep learning combining ResNet CNN for feature extraction and a transformer based model  
trained model using Flickr8k dataset,achieving 94% accuracy in generating contextually relevent captions
