ACADEMIC PROJECTS

- Chatbot for College Website**

November 2024

This project involves developing a multilingual chatbot for the college JSS Academy of Technical Education, offering information about the college in regional languages. Equipped with voice recognition, the chatbot enables users to interact via text or speech, enhancing accessibility. Key features include contact information of the college, Administration assistance for potential students, Student Support for existing students, Assistance with fee payment processes, Faculty and Staff support and answering general inquiries. The voice recognition ensures inclusivity, catering to users with varying literacy levels. This innovative solution serves as a bridge between the college and its community, providing real-time, efficient and accessible assistance to everyone seeking information about the institution.
