## OBJECTIVE:

---

As a Computer Science Engineering student, I'm driven by a passion for technology and innovation. Eager to contribute to real-world projects and gain hands-on industry experience. Aiming to learn, grow and contributing to impactful solutions.

## SKILLS:

---

- **Programming languages:** C , C++ and JAVA(*basics*)
- **Techonologies and Tools:** React, HTML , CSS , Javascript , mySQL , AWS(S3 and EC2), git and nodejs with express.
- **Soft skills:** Communication , leadership and teamwork.

## EDUCATION:

---

**JSS Academy of Technical Education ,Bangalore**

**2022 - Currently**

*Bachelor of Engineering, Computer Science – 9.1 CGPA*

**Sri Kumaran Children's Home Composite**

**Pre-University College,Bangalore**

**2020 - 2022**

*PCMB – 91.6 %*

**Prarthana Central School ,Bangalore**

**2008 - 2020**

*CBSE – 90.6 %*

## PROJECTS:

---

### Weather Application with API

- Built a weather application to fetch and display real-time weather data for any user-specified location.
- Implemented features like location-based search, dynamic updates, and responsive design.
- **Tech stack:** HTML , CSS and Javascript

### Edu-Insight: Result Analyzer Website

- It processes Excel data, calculates grades, visualizes performance with charts, and auto-generates PDF reports.
- Designed a responsive UI for smooth user experience.
- **Tech stack:** Flask, Python, Pandas, and JavaScript

### Food Delivery website

- Users can browse restaurants, add food to cart, and place orders online.
- Built with a responsive design and basic user login and order tracking features
- **Tech stack:** MERN stack (MongoDB, Express.js, React, Node.js)
