- MERN Basics

Languages

- English
- Kannada
- Telugu

PROJECTS

CarbonWise

CarbonWise is a **MERN-stack**-based platform that helps individuals and organizations track, reduce, and offset their carbon footprint.

SkinCure

Developed an AI-powered chatbot using **Gemini API, Flask, and Python** to provide personalized responses to user skin-related queries. Collaborated on a platform that also includes an ML-based image classification tool for skin disease detection

Frontend Development for Pawsie

Designed and developed the frontend of a website dedicated to the rescue, rehabilitation, and adoption of dogs using **HTML, CSS, and JavaScript**. Focused on creating an engaging and user-friendly interface to support animal welfare initiatives.

UI/UX Redesign for HealthyKid Website

Redesigned the UI/UX of the HealthyKid website to enhance usability, accessibility, and visual appeal, creating a user-friendly design in **Figma**.

EXTRA CURRICULAR ACTIVITIES

- Participated in Google DevFest, Solution Challenge, and multiple hackathons
- Managed and organized college-level technical events like Hackathons and technical events
- Displayed artwork in a selected exhibition
