Job Title
Front-End Developer – Entry Level

Role Summary
We are seeking a passionate Front-End Developer to join our team and contribute to building user-friendly and visually appealing web applications. As a part of the development team, you'll be involved in creating intuitive interfaces and working on real projects from the start. This is a great opportunity to enhance your coding skills, learn new technologies, and collaborate with experienced developers in a supportive environment.

Key Responsibilities
- Assist in designing and implementing responsive web interfaces using HTML, CSS, and JavaScript.
- Work closely with designers and back-end developers to build interactive user experiences.
- Ensure websites and applications are optimized for performance, speed, and accessibility.
- Participate in code reviews, testing, and debugging activities.
- Keep up-to-date with new technologies and best practices in front-end development.

Skills & Qualifications
Required:
- Basic understanding of HTML, CSS, and JavaScript.
- Familiarity with front-end libraries or frameworks such as React.js, Angular, or Vue.js.
- Awareness of web performance, responsiveness, and cross-browser compatibility.
- Ability to work collaboratively in a team and communicate effectively.
- A problem-solving mindset and eagerness to learn new tools and technologies.

Nice-to-have:
- Experience with version control tools like Git.
- Exposure to state management libraries like Redux or Context API.
- Knowledge of CSS preprocessors like SASS or LESS.
- Understanding of RESTful APIs and asynchronous data fetching.
- Interest in learning UI/UX design principles or testing frameworks.
