PROFILE

Motivated and detail-oriented 3rd-year Information Science engineering student at JSSATE, seeking to leverage technical and analytical skills in a challenging role. Eager to contribute to innovative projects, enhance practical experience, and grow in a dynamic work environment. Passionate about applying engineering principles to solve real-world problems.

PROJECTS

STUDENT HELPDESK USING CHATBOT
- Built a chatbot that serves as a virtual assistant to handle common student queries 24/7, reducing the workload on faculty and administrative staff.
- Implements basic NLP techniques to understand and respond to student questions in a conversational manner, enhancing user experience

JAVA SWING APPLICATION
- An Interactive online Quiz Developed with Java Swing
- This Java application based Quiz project aims to create an interactive and engaging platform for users to take quizzes online.
- Handles user authentication and starting the quiz.
- Manages the quiz logic and user interaction.

FACE EMOTION RECOGNITION USING MACHINE LEARNING ,PYTHON
- Face Emotion Recognition is a computer vision and machine learning task that detects human emotions by analyzing facial expressions. The system uses a camera (image or video input), locates a person's face, and then predicts their emotional state.
