Career Objective

To utilize my technical skills for achieving the target and developing the best performance in the organization.

Technical Skills

JavaScript, c, c++, python

PROJECTS

Automatic streetlight using LDR sensor (Mini project)

- Light Dependent Resistor (LDR), also known as a photo resistor, is a light-sensitive device whose resistance changes based on the intensity of light it receives. LDRs are commonly used in circuits to detect light and trigger actions, such as turning on a light when it gets darkAutomatic Streetlight An LDR can be used to detect when it gets dark and trigger a circuit to turn on streetlights

Fingerprint Based Biometric Attendance System (Mini project)

- The Biometric Attendance System using a fingerprint sensor provides to be reliable, secure, and efficient method for attendance tracking.
- By utilizing fingerprint recognition technology, the system minimizes human errors, fraud, and the issues associated with traditional attendance methods like manual signing or card-based system.
- The integration of a fingerprint sensor ensures that only authorized individuals can mark their attendance, which enhance security and prevents proxy attendance.

Education

Bachelor of Engineering (Electronics and communication), | JSSATE Banglore – 560 060 pursuing 6th SEM | CGPA – 6.50

Diploma in Electrical and Electronics engineering| Government Polytechnic, Kalaburagi-585312 completed in 2023 | CGPA 8.23

SSLC | Govt High School kodadur,, Kalaburagi-585312 completed in 2020 | 81.92%

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
