- **Programming languages:** Core Java, JavaScript.
- **Frameworks:** node js**,** Spring boot, Hibernate, JPA.
- **Front-end:** HTML5, CSS3, Bootstrap

- **Databases:** MySQL.
- **Operating systems:** Windows
- **Source and Version Control:** Git Hub.

PROJECTS

Vectorent (spring boot/java, React.js)

Vectorent is a full-stack web application designed to support the **rental of various assets**, including cars, electronics, appliances, tools, and more. It connects owners and renters through a streamlined platform that handles listings, bookings, user management, and availability tracking.

Cloud Based Project Management (MERN stack)

This is a full-stack web application designed to help teams **collaborate, plan, and track projects in real-time** from anywhere. Built using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, it allows users to manage tasks, assign team roles, monitor deadlines, and communicate seamlessly—all from a centralized, cloud-hosted platform.

EDUCATION

Bachelor of Engineering – Information Science Engineering (2022-2026)

JSSATEB   , Bangalore.   CGPA: 8.2
